## Introduction to Sarvatobhadra chakra

'Sarva' means all, and 'bhadra' means auspicious, thus it is the most auspicious chakra which takes's all into account. Beneficence of this particular chakra is seen from many points. This is the primary chakra which take's into account 28 nakshatras, (so Abhijit nakshatra also<sup>1</sup>). In four squares which form a perfect pyramid, astrologer (beside nakshatra) can see all consonants, rashis, tithis and days.

Thus right interpretation of janma nakshatra, day, tithi and other points will benefit astrologer in various aspects of this divine knowledge! It is one of the best tools for judging effects of graha gochara but it is also very useful in judging natal chart positions and in muhurta carts. It is believed that the use of the Sarvatobadra chakra in muhurta grants success!

<sup>1</sup> Hari, the God sits here, the One who sustain us all!

Main tool for judging the results in this chakra is called *Vedha*. Vedha means piercing, pious, etc. and it refers on the ability of graha, which causes vedha, to put some field of life under his influence. That also mean that vedha has good and bad aspect which depends from the fact is it caused by malefic or benefic planet.

This raises the first main principle in this chakra:

- a) soumya graha cause favourable vedha,
- b) krura graham cause unfavourable vedha.
- c) motion of planet is very important, hence retrograde benefic is three times stronger benefic then in direct motion, whilst retrograde malefic is extremely unfavourable,
- d) Beneficence/bad effects are in correlation with the basic karakatvas of planets<sup>3</sup>.

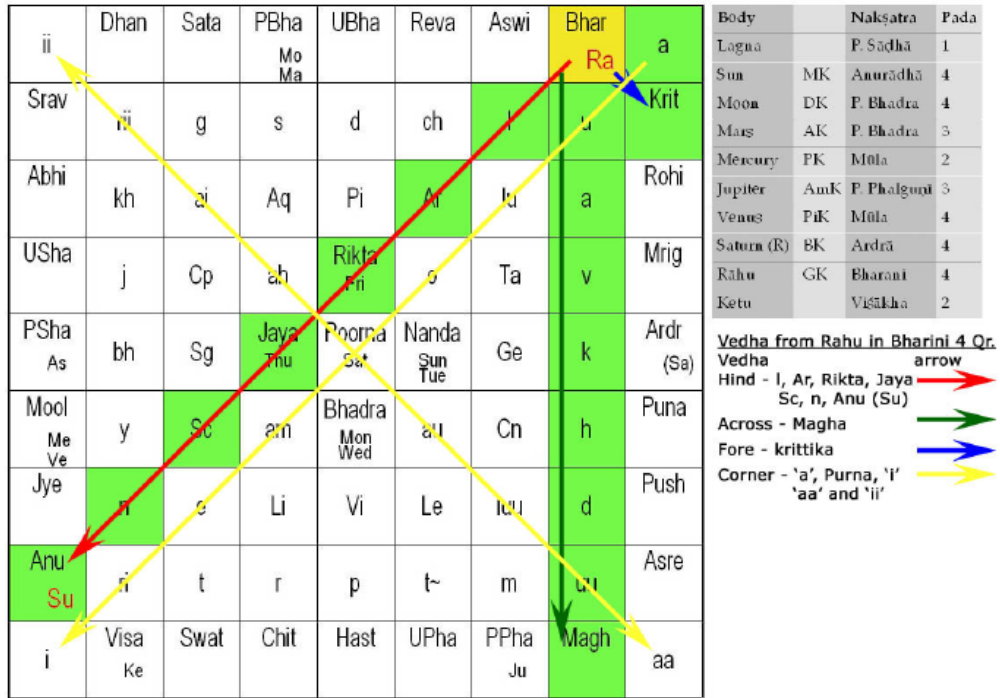

There are four types of vedha:

- 1) *Hind vedha*, is upper diagonal vedha, considered as specially important (strong) when it's caused by retrograde (retrograde) planet;
- 2) *Across vedha*, is horizontal vedha, considered as specially important when planet is in stationary motion;
- 3) *Fore vedha*, is lower diagonal vedha, considered as specially important in case of planet in direct motion;
- 4) *Corner vedha*, is formed when planet is placed in last pada of last nakshatra in line i.e. (Bharani, Asresha, Vishaka and Shravana) and in first pada of starting nakshatra in new line (Krittika, Magha, Anurada and Dhanishta).

<sup>3</sup> Sun – ego problems, misunderstandings; Mars – fights, loss of welth; Rahu and Ketu – all kinds of troubles and accidents, etc.

## **Using the Sarvatobhadra chakra**

In the sarvatobhadra chakra, the focus is on sensitive points, which can affect the native in an auspicious or inauspicious manner.

These sensitive points and their meaning is:

- (1) Janma nakshatra – it refers to quality of thought and good judgment/confusion and worries in the case of krura vedha;
- (2) Janma tithi – it refers to relationships, under the malefic vedha it brings problems in relationships, quarrels and fights;
- (3) Janma rashi – it refers to happenings in the area which is seen from bhava where janma rashi is placed, under malefic vedha show problem in that area and vice versa;
- (4) Consonants – janma consonant show the state of physical body, under the malefic vedha bring losses, bad reputation;
- (5) Vowels – refer to living prana which connects everything, hence on health matters. Under the malefic vedha brings diseases and bad health.

An analysis of these points and case studies is given below.

**Chart 1: Female - Suicide case**

**Table 1: Sensitive points**

Sensitive point	Nakshatra	Transit Vedha
Janma nakshatra	Anurada	Rahu, Mars and Merkury
Janma tithi	K. Shashti	Moon, Saturn, Mars, Merkury
Janma rashi	Vrischika	Sun
Consonant	'Ja'	Mars, Mercury, Saturn
Vowel	-	

**Principle:** *If all given parameters are under the krura vedha, death can be predicted. Effects could be graded in correlation with the auspiciousness or inauspiciousness of the transit vedha.*

In the given example we can see that Janma nakshatra is badly afflicted by Rahu (which is placed in the nakshatra), Mars and Mercury (in this chart Mercury is malefic because of conjunction with Mars) which is also retrograde (hence making Mercury three times stronger malefic). It confirms that person was worried, confused and proud to make wrong decisions.

Janma tithi has malefic vedha from three malefics: Mars, Mercury, Saturn and one benefic Moon. It confirms that person was going through some relationship problems.

Janma rashi has one krura vedha from the Sun and no benefic vedha. Janma rashi is placed in the fifth bhava, and affliction shows problem related to chitta or intelligence.

The consonant is receiving krura vedha from three planets: Mars, Mercury and Saturn, and no benefic vedha. This major affliction confirms that physical the body is damaged.

Vowels are not under any vedha in this chart.

Based on these observations, we see that the Sarvatobadra chakra clearly shows that four of five sensitive points are under strong malefic influence. Person was going through very difficult period which resulted in suicide.

**Chart 2: Adolpf Hitler**

Born on 20<sup>th</sup> April 1889 at 6.30' PM IST at Lat: 13E03' & Long 48N15'.

**Table 2: Sensitive points**

Sensitive point	Nakshatra	Transit Vedha
Janma nakshatra	P. Shada	Ketu, Mars, Saturn, Rahu
Janma tithi	K. Shashthi	Ketu, Saturn, Rahu, Mercury, Venus
Janma rashi	Dhanu	Ketu, Saturn, Rahu, Moon, Jupiter
Consonant	'A'	Sun, Mercury, Venus
Vowel	-	

In the punya chart of Adolph Hitler, Janma Nakshatra is badly afflicted from all malefics (Ketu is joined, whilst Rahu, Mars and Saturn give vedha). It shows the persons state of mind having confusion and being prone to wrong decisions, just like in previous case.

Janma tithi has Saturn, Rahu and Ketu as krura vedhas and Mercury as benefic vedha, Venus is retrograde but hind vedha will be more predominant, and in this case it will not protect this point.

Janma rashi Sagittarius again receives vedha from Ketu, Rahu and Saturn. Moon is the only hope and the weak influence of Jupiter (Jupiter is retrograde hence his influence will mostly be seen in his hind vedha). Sagittarius is the 3<sup>rd</sup> house in his chart.

Consonant 'A' is under Sun, Mercury and Venus (retrograde) have Vedas.

In this chart it is clearly seen that all malefic influences are coming on the Janma nakshatra, showing the state of mind and way of thinking. Both suicidal cases have this as the most afflicted sensitive point.

Another interesting point in this chart is, that all malefic are in middle or centre, and this afflictions connects his death and historical fall of his own country, Germany!

Chart 3: Milosevic's fall

Born on 20<sup>th</sup> August 1941 at 10.00' PM IST at Lat: 21E12' & Long: 44N38'.

Table 3: Sensitive points

Sensitive point	Nakshatra	Transit Vedha
Janma nakshatra	Pusyami	Mars
Janma tithi	K. Chartudashi	Sun
Janma rashi	Kark	Mars and Rahu
Consonant	'S'	Moon, Ketu and Saturn (retrograde)
Vowel	-	

At the day of Milosevic's fall, sarvatobadra chakra shows very inauspicious transits i.e. malefic vedhas on his sensitive points. While the first two cases did end with death of a person, this case ended with loss of power, position, and reputation, which result very soon in his resting under accusing that he made a crime against the humanity. And the most afflicted point is 'consonant' which is related to his name, fame. Janma rashi is also under krura vedha from Mars and Rahu which prove loss of support from the 3<sup>rd</sup> house area.

Milosevic at that day finally admits his loss of elections after more than 10 years of being president of Yugoslavia.

## Other uses

There are four types of boxes in the sarvatobhadra chakra. These are: nakshatra, consonant, sign and tithi box.

Each of four given boxes in Sarvatobhadra chakra carries his own energy and significance, in natal and gochara charts as well. While some of the most important points in natal chart are given in previous pages, this chakra gives vital information about the effects of current transit.

For example, while vedhas on Janma nakshatra play the important role in judging of quality of decisions and state of mind, other nakshatras play a vital role and cover different segments of person's life. Different constellations from the constellation of natal Moon stand for different things. For example, 10<sup>th</sup> nakshatra from Janma nakshatra is called Karma nakshatra and it is related to profession. Samudajaka is the 18<sup>th</sup> nakshatra from Moons nakshatra and it is related to the prosperity of our spouse, etc. But these rules should be intelligently applied after observation of Rashi chart. Benefics or malefics which cause vedha on these constellations in their transit bring good or bad results related to the area covered by the nakshatra<sup>5</sup>.

Next box contains consonants and it is very important because of all us are identified by our own name. Like in the case of Arudha, malefic influences on our name show changes in our reputation and it is especially interesting in cases of presidents and other well known persons. Krura vedha cause losses and afflict physical body.

Next box is reserved for twelve signs and the Lagna sign is the most important point. Nature of vedha on Lagna sign during particular transit, show how our intelligence or dhi works.

And finally tithi box. Five groups of tithes have a major role in choosing right muhurta chart. Thus, Purna<sup>6</sup> group specially Poornima tithi is concerned as the most auspicious one. Nothing important is supposed to be start on Rikta tithi, etc.
